Dear Sir:

As the President of Film Systems of S.W. Florida, Inc., a window tinting business, I am very concerned about the proposed law for auto window tint. I have been in business for 14 years in Englewood, Fl. and have 3 employees.

Auto window tinting makes up approximately 50% of my business. If the proposed law passes i would have no choice but to close my doors. My customers would not have their cars tinted if they couldn't have at least 35% tint on their front doors. Our Florida sun is just too strong!

Our shop prides itself on being a "Legal Tint Shop". 35% tint on front doors 20% on rear doors and rear window, according to Florida Law standards.

We are proud to say that we have tinted Charlotte County Sheriff patrol cars, as well as their K-9 units. They know that tinted windows enhances the drivers vision by reducing glare and heat.

Our customers tellus that breaking windows aren't as dangerous because the film holds that glass in place, whether in an accident or from vandalism.

Film Systems Of S. W. Florida, Inc. supports the automobile window tinting industry's petion for 35%light transmittance film

on all sides and rear windows, but would rather see a continuation of only state regulation of aftermarket automobile window tinting.

Sincerely,

Susan L. Conover
